27V571T

27" (Diagonal) Stereo Television

AlertGuard

Features	Benefits
The Alert Guard™ system warns of dozens of local, state and federal emergencies and indicates an ADVISORY, WATCH or WARNING level.	Receives all hazards NWR network with Specific Area Message Encoding. Voice and data alerts on natural disasters plus local, state, and federal emergencies.
Rear AV input options include 2 sets of Component Video (Y Pr Pb), plus one rear set of L+R+V or L+R+S-Video. A 2nd rear L+R+V can substitute for one Y Pr Pb input.	Multi-inputs allow improved grades of performance, connecting up to 4 stereo devices, with the front AV. Audio output control is selectable as fixed or variable.
Digital 3-Line Comb Filter	Separates black-and-white detail from color information to virtually eliminate edge crawls and rainbow effects while enhancing picture resolution.
Wide Band Video Amplifier	Premium-engineered chassis includes high-resolution performance-grade video amplifier for improved picture quality.
Front side AV input allows L+R+V with stereo headphone jack.	Easy front side panel allows hook-up for digital camera or camcorder, and a stereo headphone jack is provided.
Sound Logic™	Provides consistent volume levels throughout programming & channel changes. Eliminates annoying "blast" of sound during some commercial breaks.
Premium Audio Package	Enhanced audio package includes ultra low-distortion pre-amp w/ on-screen bass, treble & balance controls; 5w/chan stereo amplification & matrix expansion option.

Audio Outputs (Type)	Switchable - Variable/Fixed
F Terminal	1 for TV, 1 for Alert Guard
FRONT CONNECTORS	
Audio/Video Inputs (Composite)	1 L&R Audio, 1 Video
Headphone Jack	Yes
SPECIFICATIONS	
Finish	Silver Diamond / Slate
Product Size (WxHxD) inches	30 x 22.7 x 20.1
Approx. Shipping Weight, lbs	82
REMOTE CONTROL	
Remote Model Number	RCR160THM1
Remote Type	Universal Glo-in-the-Dark
INCLUDED ACCESSORIES	
Instruction Book Languages	English/French/Spanish

This television was certified to meet the technical performance standards effective in April 2004 for "Public Alert" video display devices as defined by the Consumer Electronics Association (CEA) and federal agencies who participated in defining this new product classification. Only devices which meet the complete standards of the CEA2009 technical standard can show the Public Alert logo. This model decodes and shows the proper text for new alert codes proposed for use, and meets the technical requirements for reception sensitivity to ensure consistently high quality when properly used. This model incorporates alert codes and geographic coverage areas unique to the United States and all U.S. Territories, and cannot operate properly outside these areas.

The Alert Guard™ system reduces annoying “false” alarms by pinpointing geographic areas in and surrounding your immediate neighborhood. Alerts received by the Alert Guard system include over 30 NOAA natural and weather events such as tornados, flash floods, avalanches, blizzards, forest fires, hurricanes, tsunamis, volcanoes, and earthquakes. Additional state and county emergency alerts include localized chemical spills, nuclear power plant emergencies, gas line breaks, chemical storage center emergencies, train derailments, oil refinery fires, immediate evacuations, and missing children alerts (AMBER alerts). Local emergency messages are available in all states, but some counties may not yet include all of the non-weather local alerts, including the AMBER alerts. As the alert system expands nationally, Alert Guard is prepared to receive alerts for areas of the United States and all U.S. territories where broadcast reception is available --- as of April 2004, this includes approximately 95% of the U.S. population.

Additional alerts are provided for all 50 states for national, regional and state civil emergencies including high-level federal emergencies, national attack warnings, terrorist attack alerts, bio-warfare alerts, and other immediate life-threatening emergencies. These national security alerts are relayed by the Federal Emergency Management Agency (FEMA), an agency of the U.S. Department of Homeland Security, and are transmitted over the National Oceanic and Atmospheric Administration (NOAA)’s broadcast network.

Weather and other hazard information brought to you by the National Oceanic and Atmospheric Administration (NOAA)
